

Working Denim at Work

Denim at the office isn't only for comfort. This year more than ever, you will see casual Fridays become an everyday norm and dressed-up denim become a trend. So how do you stay casual while looking professional? Wearing denim to the office can be pulled off with the right pair of Lee jeans and a few finishing touches.

Use these styling tricks to make your next denim ensemble exec-level chic:

- 1) Dark jeans are a must. Clean, dark denim says classic and sophisticated, while the distressed, boyfriend look can put off a weekend vibe.
- 2) Don't underdo your denim. Pair it with your staple work separates: a dressy blouse, cardigan or a blazer – style it just as you would a dress pant or pencil skirt.
- 3) Not all denim cuts are office-friendly. Opt for clean (not slouchy) style – a straight, skinny, crop, or trouser.
- 4) Decorate your denim. Any of your favorite accessories will do – a nice pair of heels, colorful skinny belt or statement necklace will make you meeting-ready in minutes.
- 5) Feeling feminine? Try layering a Lee denim jacket on top of a colorful skirt or dress. Pair it with office-chic counterparts like red lipstick and pearls to polish it off.

So there you have it. With the right pair of Lee jeans and trusty pieces to style it with, you can achieve an office look that's understated yet confident!
